

Big Shoulders Restoration Persona Knowledge Base

For AI Model Training, Personalized Marketing Operations, Lead Scoring, Sales Enablement, Referral Development, Website Personalization, and Partner Outreach

1. Executive Summary

Big Shoulders Restoration should treat personas as more than simple marketing profiles. These personas should function as an **operating knowledge base** that helps AI systems, sales teams, marketing campaigns, referral partners, website experiences, and CRM automations understand:

- Who the person is
- What they fear
- What frustrates them
- What they desire
- Why they engage
- Where they engage
- How they engage
- When they engage
- What message they need
- What proof they need
- What call to action should be shown
- How they should be scored
- How they should be nurtured
- How they should be converted into a customer, referral source, or B2B partner

This report is designed for **Big Shoulders Restoration**, a locally owned Chicagoland restoration and rebuild company serving homeowners, landlords, HOAs, property managers, insurance agents, real estate agents, and trade partners.

The target service area is approximately:

1.5 hours from Chicago city center
and
1.5 hours from Round Lake, Illinois

Big Shoulders Restoration provides:

Water damage restoration
Mold inspection and remediation
Fire and smoke restoration
Storm damage cleanup
Sewage cleanup
Emergency response
Rebuild and reconstruction
Renovations
Referral partnerships
Trade partnerships
Documentation support
Insurance-aware communication

The core purpose of this knowledge base is to make every marketing, sales, and AI interaction more relevant, more helpful, and more likely to convert.

2. Core Brand Positioning

2.1 Clean Brand Positioning Statement

Big Shoulders Restoration is a locally owned Chicagoland restoration and rebuild company helping property owners, managers, referral partners, and trade partners respond quickly to water, mold, fire, smoke, storm, sewage, rebuild, and renovation needs.

The brand should be positioned as:

Local
Fast
Calm
Professional
Documentation-focused
Insurance-aware
Property-protection focused

Relationship-driven
Capable of handling emergency response through rebuild

2.2 Core Brand Promise

Big Shoulders Restoration helps Chicagoland property owners, managers, and referral partners respond quickly to property damage with local accountability, professional documentation, and one team from emergency response through reconstruction.

2.3 Core Differentiators

Big Shoulders Restoration should consistently emphasize:

Locally owned Chicagoland company
24/7 emergency response
Water, mold, fire, smoke, storm, and sewage restoration
Rebuild and renovation capabilities
Professional documentation
Insurance-aware but coverage-neutral communication
Support for homeowners, landlords, HOAs, property managers, insurance agents, real estate agents, and trades
Local knowledge of Chicagoland homes, basements, rental properties, condos, and multi-unit buildings
One team from emergency cleanup through rebuild
Relationship-first referral partnerships

2.4 Brand Voice

Big Shoulders Restoration should sound:

Calm
Confident
Local
Practical
Clear
Fast-moving
Professional

Trustworthy
Helpful without being pushy
Urgent without being alarmist

The brand should avoid fear-based scare tactics. Restoration customers are already stressed. The tone should make them feel that Big Shoulders Restoration knows what to do, knows how to communicate, and knows how to protect the property.

2.5 Core Brand Language

Use phrases like:

“Fast local response when property damage cannot wait.”

“Water, mold, fire, smoke, storm, sewage, rebuild, and renovation support across Chicagoland.”

“One local team from emergency cleanup through reconstruction.”

“Clear documentation. Calm communication. Professional restoration.”

“Protect the property. Document the damage. Restore with confidence.”

“Big Shoulders Restoration helps property owners and managers move from emergency to fully restored.”

3. Persona Strategy Overview

The original target audiences are:

Homeowners
Landlords
HOAs
Property managers
Trades
Insurance agents
Real estate agents

For AI training and personalized marketing operations, these should be expanded into **12 operational personas**.

This gives the system more accuracy when personalizing ads, website content, chatbot responses, email sequences, call scripts, and lead scoring.

3.1 Direct Buyer Personas

1. Emergency Homeowner
 2. Preventative / Inspection Homeowner
 3. Renovation / Rebuild Homeowner
 4. Landlord / Small Multifamily Owner
-

3.2 Professional Decision-Maker and Referral Personas

5. HOA / Condo Board Member
 6. Professional Property Manager
 7. Insurance Agent
 8. Real Estate Listing Agent
 9. Real Estate Buyer's Agent
-

3.3 B2B Partner Personas

10. Plumbing / Sewer / Drain Partner
 11. HVAC / Roofing / Electrical Partner
 12. General Contractor / Remodeler / Trades Partner
-

4. Three Core Engagement Models

Every persona should be grouped into one of three engagement models.

This matters because a homeowner with standing water, a property manager looking for a vendor, and a plumber making a referral should not receive the same message or call to action.

4.1 Emergency Conversion Model

Personas

Emergency homeowners
Landlords with active tenant/property issues
Some property managers
Some HOA/condo emergencies

Goal

Convert immediately into a call, inspection, dispatch, mitigation, documentation, and rebuild opportunity.

Primary CTA

Call now
Request emergency response
Upload photos
Schedule immediate inspection

Messaging focus

Speed
Safety
Damage control
Documentation
Calm next steps
Emergency availability
One team from cleanup through rebuild

4.2 Professional Relationship Model

Personas

HOAs
Property managers
Insurance agents
Real estate agents
Landlords with multiple properties

Goal

Build trust, repeat referrals, vendor status, account value, and ongoing relationship.

Primary CTA

Request vendor packet
Schedule an intro
Refer a client
Send inspection report
Request board-ready documentation
Book property review

Messaging focus

Reliability
Professionalism
Documentation
Communication
Repeatability
Protection of reputation
Low-friction relationship

4.3 B2B Partnership Model

Personas

Plumbers
Sewer and drain companies
HVAC companies
Roofers
Electricians
General contractors
Remodelers
Other trades

Goal

Create reciprocal, low-friction referral partnerships.

Primary CTA

- Refer a customer
- Become a partner
- Call the partner line
- Send a jobsite photo
- Set up referral process

Messaging focus

- Protecting the customer relationship
- Fast handoff
- Referral tracking
- Clear communication
- No confusion over scope
- Mutual value
- Long-term partnership

5. Master Engagement Cycle

Every persona moves through a version of this cycle.

Stage 1: Trigger

This is the event that causes the person to need help.

Examples:

- Water in basement
- Burst pipe
- Sump pump failure
- Appliance leak
- Sewage backup
- Visible mold
- Musty odor
- Fire or smoke damage
- Storm damage
- Tenant complaint
- Inspection finding
- HOA common-area issue
- Property manager emergency call
- Insurance client asking for help
- Realtor needing an estimate before closing

Trade partner discovering damage outside their scope
Homeowner wanting renovation or rebuild after damage

Stage 2: Search, Ask, or Referral

The person looks for help.

Where this happens:

Google Search
Google Local Services Ads
Google Business Profile
Website
Website chat
Phone call
SMS
Facebook
Instagram
YouTube
LinkedIn
Nextdoor
Neighborhood groups
Referral from plumber
Referral from insurance agent
Referral from real estate agent
Referral from property manager
Referral from another homeowner
Direct mail
Email campaign
Partner referral form

Stage 3: Evaluation

The prospect evaluates whether Big Shoulders Restoration is credible.

They look for:

Speed
Local presence
Reviews

- Professionalism
- Certification
- Before-and-after proof
- Clear process
- Insurance documentation support
- Ability to handle rebuild
- Ability to communicate with multiple stakeholders
- Ability to handle their specific property type
- Ability to make the situation feel manageable

Stage 4: Conversion

The prospect takes action.

Possible conversion actions:

- Call now
- Upload photos
- Schedule inspection
- Request estimate
- Send inspection report
- Refer a client
- Request vendor packet
- Schedule partner intro
- Authorize emergency mitigation
- Book rebuild consultation
- Request board-ready documentation
- Ask for insurance documentation support

Stage 5: Post-Job Relationship Expansion

This is where completed work becomes reviews, repeat business, referrals, and partnerships.

- Homeowners: review, referral, seasonal prevention, rebuild/renovation upsell
- Landlords: portfolio support, tenant-turnover checklist, preferred vendor relationship
- HOAs: board education, annual property review, preferred vendor status
- Property managers: account relationship, emergency protocol, quarterly check-ins
- Insurance agents: thank-you note, client outcome update, seasonal education
- Real estate agents: inspection-response guide, pre-listing support, referral relationship
- Trades: reciprocal referrals, referral tracking, co-branded collateral

6. Persona 1: Emergency Homeowner

6.1 Persona Overview

The Emergency Homeowner is the person most likely to call in a moment of panic. They may have standing water, a burst pipe, sewage backup, storm intrusion, smoke damage, fire damage, visible mold, or an urgent safety concern.

They are emotionally overloaded and need a calm, competent expert who can tell them what to do next.

This persona is one of the highest-priority conversion audiences because delay can worsen damage, increase cost, create mold risk, and increase stress.

6.2 Relevant Services

Water damage restoration
Emergency water extraction
Basement flood cleanup
Sewage cleanup
Burst pipe damage cleanup
Appliance leak cleanup
Mold inspection
Mold remediation
Fire damage restoration
Smoke damage cleanup
Odor removal
Storm damage cleanup
Rebuild and reconstruction
Emergency stabilization

6.3 Fears

The damage is worse than it looks.
Mold is already growing behind walls.

The home is unsafe for children, pets, or elderly family members.
Insurance will deny the claim.
They will say the wrong thing to insurance.
A contractor will overcharge them during an emergency.
The home will not be livable.
The finished basement will be ruined.
The problem will come back.
They will need multiple companies and will not know who is responsible.
They will make the wrong decision because they are stressed.

6.4 Frustrations

They do not know what to do first.
They cannot get someone to answer after hours.
Insurance language is confusing.
They do not know whether the situation is water damage, flood damage, sewer backup, mold, or something else.
They receive vague answers.
They are asked to wait when the situation feels urgent.
They have to coordinate cleanup, insurance documentation, repair, and rebuild separately.
They do not know whether the contractor is trustworthy.
They feel embarrassed, especially with sewage, basement flooding, or mold.

6.5 Desires

They want the damage stopped.
They want someone to arrive quickly.
They want a calm expert to explain what happens next.
They want their home safe, dry, clean, and livable.
They want help documenting damage.
They want clarity before speaking with insurance.
They want a company that can handle both mitigation and rebuild.
They want peace of mind.
They want to feel that the situation is under control.

6.6 Why They Engage

They engage because their home, family comfort, safety, or financial security is threatened.

Primary triggers include:

Standing water

Wet carpet or flooring

Water coming through the ceiling

Burst pipe

Frozen pipe

Sump pump failure

Sewage backup

Storm water intrusion

Musty smell after a water event

Smoke or soot damage

Fire department just left

Mold visible on drywall, ceiling, attic, or basement

Plumber stopped the source but wet materials remain

Appliance leak from washer, dishwasher, refrigerator, or water heater

6.7 Where They Engage

Google Search

Google Local Services Ads

Google Business Profile

Emergency service pages

Website phone number

Website chat

Mobile click-to-call

Facebook neighborhood groups

Nextdoor

Referral from plumber

Referral from insurance agent

Referral from friend or neighbor

YouTube educational videos

Retargeting ads after visiting water, mold, fire, or emergency pages

6.8 How They Engage

Phone call for true emergencies

Text or SMS if available

Website form for lower urgency
Photo upload
Chatbot triage
Referral handoff from plumber, agent, neighbor, or friend

6.9 When They Engage

Immediately after discovering damage
After attempting towels, fans, or shop vacs
After calling a plumber
After calling insurance
After a storm
After basement flooding
After a fire is extinguished
After noticing smell, stains, or visible mold
At night or early morning during urgent situations
After realizing the issue is beyond a simple cleanup

6.10 Decision Criteria

Can you come quickly?
Do you answer the phone?
Are you local?
Do you handle my type of damage?
Will you explain the process clearly?
Can you help with documentation?
Can you rebuild afterward?
Do you have reviews?
Are you certified?
Will I be pressured or upsold?
Will you help me understand what to do before insurance decides coverage?

6.11 Common Objections

“I need to call insurance first.”
“Can I dry this myself?”
“It is not that much water.”

“I do not want to spend a lot.”
“My handyman can fix it.”
“I am worried insurance will not cover it.”
“I want to wait until morning.”
“I need another estimate.”
“I just need mold testing.”
“I already have fans running.”
“The plumber said the leak is fixed, so I think I’m good.”

6.12 Best Messaging

“Fast local help when water, mold, fire, smoke, sewage, or storm damage cannot wait.”
“Big Shoulders Restoration handles emergency cleanup, documentation, and rebuild.”
“Protect your home before hidden moisture creates bigger problems.”
“One local team from emergency response through reconstruction.”
“Call now if water is active, sewage is involved, or materials are wet.”

6.13 Do-Not-Say Guidance

Do not guarantee insurance coverage.
Do not use scare tactics.
Do not overstate health claims.
Do not say “flood” unless the customer specifically describes outside floodwater or overland water.
Do not tell them everything is covered.
Do not minimize sewage or electrical risk.
Do not say the issue is minor without inspection.
Do not promise exact arrival times unless operations can confirm.

6.14 AI Response Rules

The AI should:

Prioritize safety.

Ask whether water is still entering.

Ask whether electricity is affected.

Ask whether sewage is involved.

Ask whether the property is occupied.

Ask if children, elderly residents, or pets are present.

Ask for photos if safe.

Recommend phone escalation for standing water, sewage, fire/smoke, active leaks, ceiling collapse, or electrical risk.

Use coverage-neutral insurance language.

Avoid alarming language.

Give clear next steps.

6.15 Lead Scoring

Score 90–100

Standing water

Active leak

Sewage

Fire or smoke event

Wet drywall or ceiling

Finished basement affected

Children, elderly residents, or health concerns mentioned

Insurance claim mentioned

Photo uploaded

Address provided

Call after hours

Customer asks, “How soon can you come?”

Score 70–89

Musty smell after water event

Visible mold

Plumber just completed repair

Water stain expanding

Storm damage

Needs same-week inspection

Customer has photos

Customer asks about rebuild

Score 40–69

General education
Old damage
No urgency
Price shopping
No address or timeline

6.16 Nurture Sequence

Immediate Emergency Sequence

Message 1: "We received your request. If water is active, sewage is involved, or there is fire/smoke damage, call now for emergency response."

Message 2: "If safe, take photos and avoid electrical areas. Do not remove materials unless advised."

Message 3: "Big Shoulders Restoration can inspect, extract, dry, document, and rebuild."

Message 4: "Would you like to send photos or schedule immediate response?"

Post-Inspection Sequence

Day 0: Scope recap

Day 1: Documentation checklist

Day 3: Why drying and moisture detection matter

Day 7: Rebuild and reconstruction options

Day 14: Review/referral request after completion

6.17 Website Personalization

Hero: "Water, Mold, Fire, Smoke, or Sewage Damage? Call Big Shoulders Restoration 24/7."

Primary CTA: "Call Now"

Secondary CTA: "Upload Photos"

Proof points:

Locally owned Chicagoland company
Emergency response

Water, mold, fire, smoke, storm, sewage, and rebuild
Professional documentation
One team from cleanup through reconstruction

7. Persona 2: Preventative / Inspection Homeowner

7.1 Persona Overview

This homeowner is not always in crisis. They may smell mildew, notice condensation, see minor staining, suspect mold, plan basement finishing, or want to understand whether water intrusion is serious.

They need education, inspection, trust, and clear next steps.

7.2 Relevant Services

Mold inspection
Mold remediation
Moisture inspection
Leak detection coordination
Crawl space encapsulation
Basement moisture evaluation
Preventative drying
Storm or leak assessment
Small repairs
Rebuild planning
Renovation planning

7.3 Fears

Hidden mold
Health concerns
Property value loss

A minor issue becoming expensive
Being upsold
Hiring someone who exaggerates the problem
Selling or refinancing later and discovering a bigger issue
Finishing a basement over moisture problems
Wasting money on the wrong solution

7.4 Frustrations

Vague online information
Conflicting advice
Not knowing if the smell is mold
Contractors who only want large jobs
Testing companies and remediation companies giving different answers
Not knowing whether to call a plumber, roofer, restoration company, or mold specialist
Feeling dismissed because the issue is not dramatic yet

7.5 Desires

Honest answers
Clear diagnosis
Prevention
Affordable next steps
Confidence before remodeling
A safe, dry, healthy home
A company that will not upsell unnecessary work
Peace of mind before the problem gets worse

7.6 Why They Engage

They engage because something feels wrong but may not be urgent yet.

Triggers include:

Musty smell
Small water stain
Condensation

Past leak
Humidity
Mold concern
Basement dampness
Buying a dehumidifier did not solve the problem
Planning basement finishing
Preparing to sell
After a buyer inspection
After a tenant or family member complains about odor

7.7 Where They Engage

Google Search
Organic SEO pages
Blog posts
YouTube educational videos
Facebook
Nextdoor
Homeowner forums
Google Business Profile
Website FAQs
Retargeting ads
Email seasonal education
Direct mail in older neighborhoods

7.8 How They Engage

Form fill
Photo upload
Chatbot question
Phone call during business hours
Estimate request
Inspection booking
Educational content download

7.9 When They Engage

After repeated smell
Before a renovation
After spring thaw or heavy rain
After humid summer weather
Before selling
After a buyer inspection
After noticing recurring stains
After family health concerns arise
Before finishing a basement
Before buying or selling a home

7.10 Decision Criteria

Do you seem honest?
Will you inspect before quoting?
Do I need testing?
Will you explain what is happening?
Are you certified?
Do you know Chicagoland basements, attics, and older homes?
Can you fix the root cause?
Will you tell me if I do not need major work?

7.11 Common Objections

"I do not know if this is mold."
"I just want testing."
"I am worried this will become expensive."
"I want to wait."
"I can clean it with bleach."
"I just need a dehumidifier."
"My basement always smells like this."
"I do not see visible mold."
"I only need a small area looked at."

7.12 Best Messaging

"Find out what is really going on before it becomes a bigger problem."

“Honest mold and moisture inspections for Chicagoland homes.”

“Moisture, mold, and rebuild expertise under one roof.”

“We identify the issue, explain the options, and recommend the right next step.”

“Do not remodel over unresolved moisture.”

7.13 AI Response Rules

The AI should:

Educate without alarming.

Ask about smell, visible growth, water history, location, humidity, HVAC, basement, attic, or crawl space.

Ask whether anyone has cleaned, painted, or covered the area.

Ask whether the issue is tied to a recent leak, storm, humidity, or old damage.

Offer inspection as the next step.

Avoid diagnosing mold without inspection or testing.

7.14 Lead Scoring

Score 75–89

Visible mold

Musty smell plus past water event

Inspection deadline

Children, elderly residents, or health concern mentioned

Basement finishing planned

Home sale or purchase involved

Score 50–74

General mold concern

Small stain

Humidity issue

Photo uploaded

Recurring smell

Score 20–49

General education only
No property details
No timeline

7.15 Website Personalization

Hero: "Concerned About Mold, Moisture, or a Musty Smell?"

Primary CTA: "Schedule an Inspection"

Secondary CTA: "Upload Photos"

Proof points:

Honest inspection
Moisture expertise
Mold remediation
Rebuild support
Local Chicagoland experience

8. Persona 3: Renovation / Rebuild Homeowner

8.1 Persona Overview

This homeowner may have completed mitigation and now needs reconstruction, or they may want to renovate a basement, kitchen, bathroom, or damaged area.

Their decision is less about emergency response and more about trust, craftsmanship, design, timeline, and convenience.

8.2 Relevant Services

Rebuild after water damage
Rebuild after fire or smoke damage

Rebuild after mold remediation
Drywall repair
Flooring
Painting
Basement rebuild
Bathroom remodel
Kitchen repair or remodel
Crawl space improvement
Full renovations
Post-mitigation reconstruction

8.3 Fears

Poor workmanship
Project delays
Cost overruns
Contractor disappearing
Damage returning
Renovating over unresolved moisture
Insurance scope not matching final costs
Having to manage multiple companies
Living in a construction zone longer than expected

8.4 Frustrations

Cleanup is done but the space is not usable.
The mitigation company does not handle rebuild.
Insurance estimates are confusing.
Contractors do not call back.
Small rebuild projects are ignored.
Design and restoration feel disconnected.
They are tired of disruption.
They do not know what upgrades are worth considering.

8.5 Desires

- One accountable team
- Clear scope
- Good workmanship
- Better-than-before result
- Restored property value
- Finished space
- Design flexibility
- Insurance documentation support where applicable
- A smooth transition from cleanup to reconstruction

8.6 Why They Engage

The emergency may be over, but the property is not whole.

They need the space repaired, improved, or upgraded.

Triggers include:

- Mitigation completed
- Drywall removed
- Flooring removed
- Fire/smoke cleanup completed
- Mold remediation completed
- Insurance estimate received
- Homeowner wants upgrades
- Basement needs rebuilding
- Bathroom or kitchen damaged
- Property needs to be restored before sale
- Family wants normal life back

8.7 Where They Engage

- Website rebuild pages
- Before-and-after galleries
- Google Search
- Retargeting after mitigation content
- Facebook
- Instagram
- YouTube project videos
- Referral from adjuster

Referral from plumber
Referral from realtor
Referral from property manager
Email after emergency job

8.8 How They Engage

Estimate request
Project consultation
Photo upload
Phone call
Follow-up after mitigation
Email with insurance estimate or scope
Website form

8.9 When They Engage

After drying is complete
After insurance estimate
After mold remediation
After fire or smoke cleanup
Before selling
Before moving back into a room
During planned remodeling
After realizing they want upgrades, not just repairs
After deciding they want one company to finish the job

8.10 Decision Criteria

Can you rebuild what was damaged?
Can you improve the space?
Will the finished work look good?
Will the schedule be clear?
Can you explain the scope?
Can you coordinate with documentation or insurance paperwork?
Can you handle both repair and renovation?
Will you communicate throughout the project?

8.11 Common Objections

“I only want it put back the way it was.”

“I want to upgrade, but I do not know what insurance covers.”

“I need to understand the difference between repair and renovation.”

“I am worried about cost.”

“I do not want this project dragging on.”

“I already had another company do the cleanup.”

“I need the space usable again quickly.”

8.12 Best Messaging

“Restore it right. Rebuild it better.”

“One team from cleanup to reconstruction.”

“Turn property damage into a finished space again.”

“Repair, rebuild, remodel — with restoration knowledge built in.”

“From emergency response to finished renovation.”

8.13 AI Response Rules

The AI should ask:

Is mitigation complete?

Was drying completed?

Was mold remediation completed?

Is there an insurance estimate?

What rooms are affected?

Are upgrades desired?

Is this repair-only or renovation-oriented?

Is there a target completion date?

Are photos available?

8.14 Lead Scoring

Score 80–100

Recent Big Shoulders mitigation customer
Insurance estimate received
Room unusable
Kitchen, bathroom, or finished basement affected
Home sale timeline
Customer wants both repair and upgrade
Photos uploaded
Ready for estimate

Score 60–79

General rebuild need
Damage already cleaned up
Customer comparing options
Timeline within 30–60 days

Score 30–59

Future renovation idea
No active damage
No clear timeline

8.15 Website Personalization

Hero: “Rebuild and Renovation After Property Damage.”

Primary CTA: “Request a Rebuild Consultation”

Secondary CTA: “Upload Your Scope or Photos”

Proof points:

Repair and renovation
Water, mold, fire, smoke rebuild
One team from cleanup through reconstruction
Before-and-after examples
Local Chicagoland experience

9. Persona 4: Landlord / Small Multifamily Owner

9.1 Persona Overview

The landlord owns rental property and needs damage resolved quickly to protect income, tenant satisfaction, habitability, and asset value.

They may own:

Single-family rental

Two-flat

Three-flat

Condo rental

Small apartment building

Small portfolio of rental homes or units

They may live nearby or be a remote owner.

9.2 Relevant Services

Water damage cleanup

Mold remediation

Sewage cleanup

Fire/smoke restoration

Tenant turnover repairs

Rebuild

Unit restoration

Emergency response

Documentation

Renovations between tenants

Odor removal

Storm damage repair

9.3 Fears

Tenant complaints
Rent loss
Vacancy
Habitability issues
Mold accusations
Legal exposure
Damage spreading
Insurance denial
Bad documentation
Out-of-town coordination failure
Tenant posting negative comments or complaints
Losing control of the situation
A small issue becoming expensive

9.4 Frustrations

Tenant panic
No access
Contractors who will not coordinate with tenants
No photos or updates
Missed appointments
Unclear invoices
Slow drying or rebuild
Insurance confusion
Lack of urgency from vendors
Having to manage everything remotely
Tenant and contractor communication breakdowns

9.5 Desires

Fast resolution
Tenant coordination
Clear documentation
Remote communication
Fair pricing
Rent-ready unit
Protection of asset value

Minimal drama
Preferred vendor relationship
Reliable updates
Reduced vacancy time

9.6 Why They Engage

They engage when property damage threatens rent, occupancy, tenant satisfaction, or legal/financial exposure.

Triggers include:

Tenant reports water
Tenant reports mold
Sewage backup
Appliance leak
Burst pipe
Unit-to-unit leak
Fire or smoke damage
Vacancy turnover
Pre-listing repair
Plumber discovers hidden damage
Storm leak
City or insurance concern
Tenant threatens to withhold rent or escalate

9.7 Where They Engage

Google Search
Plumber referrals
Real estate investor groups
Landlord groups
Facebook groups
LinkedIn
Email campaigns
Direct mail
Insurance agent referrals
Property manager referrals
Retargeting ads
Real estate investor networks

9.8 How They Engage

Phone call

Text

Email

Remote form fill

Tenant handoff

Photo upload

Access coordination through tenant

Access coordination through lockbox

Referral from trade partner

Referral from agent

9.9 When They Engage

When tenant complains

During after-hours emergencies

Before lease renewal

During turnover

Before listing or refinancing

After plumber stops the source

After storm or freeze events

When rent-ready status is at risk

When an issue affects habitability

When the landlord is worried about liability

9.10 Decision Criteria

Can you coordinate with the tenant?

Will you send photos?

Can I manage this remotely?

Can you document the damage?

Can you finish the unit?

Can you prevent future issues?

Will you communicate clearly?

Can you help minimize vacancy?

Can you work around tenant schedules?
Can you handle cleanup and rebuild?

9.11 Common Objections

“My tenant may be exaggerating.”
“I do not want to overpay.”
“I need this done before the next tenant.”
“Can my handyman handle it?”
“I am out of town.”
“I need to talk to insurance.”
“I need documentation before approving.”
“The tenant is hard to coordinate with.”
“I need this unit rent-ready fast.”

9.12 Best Messaging

“Protect the asset. Calm the tenant. Document the damage.”
“Fast restoration for Chicagoland rental properties.”
“Emergency cleanup, tenant coordination, and rebuild handled by one local team.”
“Remote-friendly updates with photos, scope, and documentation.”
“Restore the unit and reduce vacancy risk.”

9.13 AI Response Rules

The AI should collect:

Owner name
Property address
Unit number
Tenant contact
Access permission
Urgency
Occupancy status

Cause of damage
Insurance status
Photos
Whether rent-ready timing is affected
Whether multiple units are affected
Whether the landlord is local or remote

9.14 Lead Scoring

Score 90–100

Occupied rental with active water or sewage
Tenant displacement risk
Multi-unit damage
Insurance claim
Landlord owns multiple units
Immediate access available
Rent-ready deadline
Mold complaint from tenant

Score 70–89

Mold complaint
Vacant unit needing quick turn
Water damage after plumber visit
Upcoming tenant move-in
Remote landlord needing documentation

Score 40–69

General estimate
Old damage
No timeline
Single minor issue with no urgency

9.15 Website Personalization

Hero: “Restoration for Rental Properties and Small Multifamily Owners.”

Primary CTA: "Schedule Emergency Response"

Secondary CTA: "Send Photos or Coordinate Tenant Access"

Proof points:

Tenant coordination

Photo updates

Documentation

Emergency cleanup

Rebuild

Rent-ready support

Local Chicagoland service

10. Persona 5: HOA / Condo Board Member

10.1 Persona Overview

The HOA or condo board member is often a volunteer decision-maker responsible for protecting the association, shared property, common elements, and owner trust.

They may not be a property expert, but they must make decisions that affect multiple residents and association funds.

They need documentation, clarity, professionalism, and conflict reduction.

10.2 Relevant Services

Multi-unit water restoration

Common-area restoration

Mold remediation

Fire/smoke cleanup

Storm damage

Roof leak interior damage

Unit-to-unit water damage

Documentation

- Board-ready estimates
- Rebuild
- Emergency stabilization
- Odor removal
- Shared-space restoration

10.3 Fears

- Making the wrong decision
- Owner complaints
- Association liability
- Common-vs-unit responsibility disputes
- Insurance gaps
- Special assessments
- Damage spreading to multiple units
- Hiring an unprofessional vendor
- Not having documentation for the board or insurer
- Conflict between residents
- Being blamed by other owners
- Approving work without enough information

10.4 Frustrations

- Slow board approvals
- Multiple stakeholders
- Unclear scope
- Lack of documentation
- Vendors who cannot explain issues clearly
- Residents arguing over responsibility
- Insurance delays
- Property manager bottlenecks
- Emergency work needed before formal approval
- Difficulty getting everyone aligned
- Confusing communication between owners, board, manager, and vendor

10.5 Desires

Professional documentation

Clear explanation

Board-ready scope

Emergency stabilization

Reduced conflict

Trusted vendor

Proof of insurance

Predictable communication

Protection of association funds

Clear distinction between immediate mitigation and long-term repair

Confidence that the board is acting responsibly

10.6 Why They Engage

They engage because a property issue affects shared responsibility, common areas, multiple units, or association risk.

Triggers include:

Unit-to-unit leak

Common hallway damage

Roof leak

Basement or common-area water

Shared plumbing failure

Mechanical room water

Mold in common areas

Fire or smoke in building

Storm damage

Multiple owner complaints

Insurance claim affecting association

Property manager escalation

Upcoming board meeting

10.7 Where They Engage

Property manager referral

Google Search

LinkedIn

HOA board networks

Condo association networks

Direct mail
Educational webinars
Insurance agent referral
Board member referral
Vendor directories
Community association events

10.8 How They Engage

Phone call for emergency
Email for board documentation
Formal estimate request
Property manager introduction
Board packet request
Photo or report sharing
Meeting or walkthrough
Group email with board members
Request for COI/W-9

10.9 When They Engage

Before board meeting
After owner complaint
After property manager escalates
After damage affects multiple units
After storm event
After insurance asks for documentation
When emergency mitigation cannot wait
During annual vendor review
When a resident dispute emerges
When damage affects common areas

10.10 Decision Criteria

Are you insured?
Can you provide COI/W-9?
Can you document clearly?

Can you communicate with board and residents?
Can you stabilize now and scope later?
Do you understand multi-unit buildings?
Can you avoid inflaming conflict?
Can you produce a clear estimate?
Can you explain the situation to non-experts?
Can you work with the property manager?

10.11 Common Objections

“We need board approval.”
“We need multiple bids.”
“We need to know if this is association or unit owner responsibility.”
“We need to talk to insurance.”
“We cannot authorize without documentation.”
“We have a property manager.”
“We need a vendor packet.”
“We need this in writing.”
“We need to discuss at the next meeting.”

10.12 Best Messaging

“Board-ready documentation for water, mold, fire, smoke, and storm damage.”
“Emergency stabilization now. Clear scope and documentation after.”
“Professional restoration support for Chicagoland condo associations and HOAs.”
“Reduce confusion, protect residents, and document every step.”
“Clear communication for boards, managers, owners, and residents.”

10.13 AI Response Rules

The AI should determine:

Is this a common area, single unit, or multi-unit issue?
Is a property manager involved?

Who can authorize emergency mitigation?
How many units are affected?
Is insurance involved?
Is a board packet required?
Is immediate stabilization needed?
Is there a board meeting date?
Are owners or residents actively complaining?
Are photos or reports available?

10.14 Lead Scoring

Score 90–100

Multi-unit active water
Common area impacted
Insurance claim
Emergency authorization available
Property manager involved
Multiple residents affected
Board meeting deadline
Active resident complaints

Score 70–89

Board documentation needed
Mold concern
Roof or storm leak
Need for vendor packet
Formal bid request

Score 40–69

General planning
No urgency
Future vendor consideration
No decision-maker identified

10.15 Website Personalization

Hero: “Restoration Support for HOAs and Condo Associations.”

Primary CTA: “Request Board-Ready Documentation”

Secondary CTA: “Request Emergency Stabilization”

Proof points:

COI/W-9 available

Multi-unit documentation

Professional communication

Common-area restoration

Emergency response

Rebuild support

11. Persona 6: Professional Property Manager

11.1 Persona Overview

The property manager is one of the highest lifetime-value personas.

They manage problems on behalf of owners, boards, tenants, and residents. They do not simply need a contractor. They need a vendor who reduces operational burden.

A great restoration partner makes the property manager look responsive, organized, and in control.

11.2 Relevant Services

Emergency water response

Mold remediation

Fire/smoke restoration

Sewage cleanup

Storm damage

Rebuild

Tenant coordination

Resident communication support

Documentation
Portfolio vendor support
After-hours emergency response
Recurring account service
Vendor packet support
COI/W-9 readiness

11.3 Fears

Vendor failure
Tenant escalation
Owner complaints
Board dissatisfaction
After-hours chaos
Documentation gaps
Insurance friction
Project delays
Poor resident communication
Having to babysit contractors
Being blamed for unresolved damage
Losing account trust because of a vendor issue
Emergency issues spiraling out of control

11.4 Frustrations

Vendors do not answer.
Vendors do not send updates.
Vendors miss appointments.
Vendors do not provide photos.
Vendors cannot handle documentation.
Vendors do not respect resident communication rules.
Vendors turn every issue into a management burden.
Vendors perform cleanup but cannot rebuild.
Vendors make residents more upset.
Vendors require too much chasing.

11.5 Desires

- Reliable preferred vendor
- Fast dispatch
- Clear updates
- Photo documentation
- Minimal chasing
- One accountable team
- Portfolio-level trust
- Emergency protocol
- Professional resident communication
- Vendor who makes the property manager look good
- A partner who can handle both emergency and rebuild
- A backup vendor for overflow or urgent situations

11.6 Why They Engage

They engage because property damage threatens operations, resident satisfaction, owner trust, and portfolio efficiency.

Triggers include:

- Tenant complaint
- Resident complaint
- Owner request
- Board complaint
- After-hours emergency
- Storm event
- Water intrusion
- Mold complaint
- Fire or smoke event
- Vendor replacement
- Annual vendor review
- Need for COI/W-9
- Portfolio emergency planning
- Current vendor failure

11.7 Where They Engage

- LinkedIn
- Direct email
- Phone outreach

Property management associations
Vendor events
Lunch-and-learns
Referrals from other managers
Google Search
Direct sales visits
CRM nurture
Emergency vendor lists
Trade partner referrals
Local networking

11.8 How They Engage

Direct phone line
Text
Email
Vendor packet request
Emergency dispatch form
Portfolio intro meeting
Recurring vendor onboarding process
Property management software note or email
Group email with owner or board
After-hours call

11.9 When They Engage

After-hours emergencies
Tenant escalation
Storm or freeze seasons
Board meetings
Owner complaints
Annual vendor review
When current vendor fails
Before high-risk weather seasons
When onboarding new properties
When trying to reduce vendor list complexity
When they need overflow support

11.10 Decision Criteria

Can I trust you repeatedly?

Do you answer after hours?

Will you send photos and updates?

Can you handle multiple stakeholders?

Do you have COI/W-9?

Can you handle rebuild?

Can you communicate professionally with tenants, owners, residents, and boards?

Can you reduce my workload?

Can you follow our process?

Can you be consistent?

11.11 Common Objections

“We already have a vendor.”

“We need you approved first.”

“Send your COI and W-9.”

“We need better pricing.”

“We need consistent communication.”

“We need to see how you perform on one job first.”

“Our board or owner must approve.”

“We cannot have residents confused.”

“We need clear invoices and scopes.”

“We need a backup vendor before we send regular work.”

11.12 Best Messaging

“Your emergency restoration partner for properties that cannot wait.”

“Fast response, clear updates, documentation, and rebuild support.”

“Less vendor chasing. More resolved problems.”

“Built for property managers: emergency response, resident coordination, and portfolio-level reliability.”

“Protect residents, owners, boards, and your time.”

11.13 AI Response Rules

The AI should treat property manager leads as account opportunities, not just one-time jobs.

It should collect:

- Portfolio size
- Property types
- Geography
- Emergency volume
- Current vendor pain points
- COI/W-9 needs
- Preferred communication method
- After-hours protocol
- Billing requirements
- Resident communication rules
- Decision process
- Whether there is an active job
- Whether they need a vendor packet

11.14 Lead Scoring

Score 95–100

- Portfolio manager
- Immediate active water, fire, smoke, mold, or sewage emergency
- Multiple properties
- Requests vendor packet
- Mentions replacing vendor
- After-hours need
- Board or owner relationship
- Wants preferred vendor conversation

Score 75–94

- One property emergency
- Recurring issues
- Mold complaint
- Needs COI/W-9
- Asks about vendor status
- Portfolio intro requested

Score 50–74

General intro
No current job
Future vendor consideration
Lower portfolio size but relationship potential

11.15 Website Personalization

Hero: “Emergency Restoration Built for Property Managers.”

Primary CTA: “Request Vendor Packet”

Secondary CTA: “Call for Emergency Dispatch”

Proof points:

24/7 response
Documentation
COI/W-9
Rebuild
Tenant and resident coordination
Portfolio support
Clear communication

12. Persona 7: Insurance Agent

12.1 Persona Overview

Insurance agents are referral influencers. They usually do not purchase restoration services directly, but they are often the first trusted person a policyholder calls after a loss.

The agent’s reputation depends on whether the client feels helped, informed, and protected.

The agent does not want a contractor who creates unrealistic expectations about coverage. They want a professional restoration partner who can help the client act quickly and document the situation properly.

12.2 Relevant Services

Emergency water mitigation
Fire/smoke restoration
Mold inspection and remediation
Sewage cleanup
Storm damage cleanup
Documentation support
Photo documentation
Scope support
Rebuild
Client education
Emergency response

12.3 Fears

Client dissatisfaction
Being blamed for claim denial
Contractor overpromising coverage
Poor client experience
Slow contractor response
Documentation gaps
Client saying the wrong thing
Agent being pulled into adjuster-level conversations
Referral damaging their reputation
Client thinking the agent was not helpful

12.4 Frustrations

Clients wait too long.
Clients misunderstand coverage.
Clients panic and expect the agent to solve everything.
Contractors tell clients “insurance will cover it.”
Poor documentation creates claim friction.
Clients use inaccurate terms to describe the damage.
Agents do not get updates after referring.
Clients call the agent repeatedly because they do not know next steps.

12.5 Desires

- Protect the client relationship
- Get the client help quickly
- Avoid coverage promises
- Receive confirmation that the client was contacted
- Work with a professional company
- Reduce chaos
- Improve client retention
- Be seen as helpful and connected
- Have a trusted restoration resource
- Support the client without crossing coverage boundaries

12.6 Why They Engage

They engage because a client needs immediate help and the agent wants to provide a reliable referral without creating coverage problems.

Triggers include:

- Client calls about water damage
- Client asks “Who should I call?”
- Sewer backup
- Burst pipe
- Fire or smoke damage
- Storm damage
- Mold concern
- Client confused about claim
- Client needs documentation
- Client is stressed after a property loss

12.7 Where They Engage

- LinkedIn
- Email
- Phone
- Insurance office visits
- Networking groups
- Chambers of commerce

Referral partner pages
Lunch-and-learns
Client education campaigns
Co-branded seasonal checklists
Referral forms
Local business groups

12.8 How They Engage

Warm handoff
Phone call
Text introduction
Email introduction
Referral form
Client sends photos
Agent asks Big Shoulders Restoration to call client
Agent shares emergency contact info with client

12.9 When They Engage

Immediately after client call
During storm or freeze seasons
During claim confusion
When client asks for a trusted contractor
Before client makes a preventable mistake
During renewal or retention-sensitive moments
After a client describes water, sewage, mold, fire, smoke, or storm damage
When the agent wants educational content for clients

12.10 Decision Criteria

Will you take care of my client?
Will you avoid promising coverage?
Will you document properly?
Will you communicate professionally?
Will you make me look helpful?
Will you update me appropriately?

Will you respect carrier and adjuster boundaries?
Will you explain next steps calmly?
Will you pressure my client?
Will you handle the client professionally?

12.11 Common Objections

“We cannot promise coverage.”
“We do not want coverage promises.”
“My client needs to understand coverage depends on the policy.”
“I need to know you will not pressure them.”
“I need you to call them quickly.”
“I need documentation, not drama.”
“We want to be careful about how we refer vendors.”
“Do not tell the client what is covered.”

12.12 Best Messaging

“Help your clients act quickly and document the damage properly.”
“We support the insured without making coverage promises.”
“Fast response, professional documentation, and client-first communication.”
“Coverage-neutral restoration support for your policyholders.”
“Big Shoulders Restoration helps your clients move from panic to next steps.”

12.13 AI Response Rules

The AI should never say a loss is covered.

Use language like:

“Coverage depends on the policy, cause of loss, endorsements, exclusions, and carrier review.”

The AI should emphasize:

Mitigation
Documentation
Photos
Moisture readings
Scope clarity
Client communication
Referral confirmation
Next-step support
Emergency response when appropriate

12.14 Lead Scoring

Score 90–100

Agent refers active client loss
Client contact provided
Emergency water, fire, smoke, sewage, or mold issue
Agent wants immediate callback
Insurance claim involved
Client is ready for contact

Score 70–89

Agent asks about referral relationship
Seasonal client education
Wants partner packet
Multiple clients possible
Agent requests lunch-and-learn or educational material

Score 40–69

General networking
No current client need
Loose future interest

12.15 Website Personalization

Hero: “Restoration Support for Insurance Agents and Their Clients.”

Primary CTA: "Refer a Client"

Secondary CTA: "Request Partner Info"

Proof points:

Coverage-neutral communication

Documentation-focused

Client-first response

Emergency availability

Professional follow-up

Local Chicagoland company

13. Persona 8: Real Estate Listing Agent

13.1 Persona Overview

The listing agent represents a seller. Their priority is protecting listing value, preparing the property for market, resolving inspection issues, and keeping the deal from falling apart.

They need fast estimates, credibility, and repair options.

13.2 Relevant Services

Mold inspection and remediation

Water damage repair

Fire/smoke repair

Pre-listing repairs

Inspection response

Basement moisture repair

Rebuild

Renovation

Odor removal

Documentation

Estimate support

13.3 Fears

Deal falling apart
Buyer panic
Inspection issues killing negotiation
Seller refusing repairs
Timeline delays
Low appraisal due to damage
Hidden mold
Contractor unavailable before closing
Damage disclosure hurting value
Losing commission because a repair issue was not handled
Bad vendor making the agent look unprofessional

13.4 Frustrations

Short timelines
Unclear inspection language
Slow contractors
Sellers minimizing damage
Buyers overreacting
Need for fast written estimates
Repair scope uncertainty
Lack of professional documentation
Difficulty getting access before deadlines
Vendors who do not understand real estate timelines

13.5 Desires

Protect the transaction
Support the seller
Resolve issues quickly
Get credible documentation
Avoid surprises
Improve marketability
Have a trusted vendor to call repeatedly
Keep buyer confidence
Help seller make informed decisions
Move the deal forward

13.6 Why They Engage

They engage because water, mold, fire/smoke, odor, or structural moisture issues threaten the sale.

Triggers include:

- Pre-listing repair need
- Inspection report mentions mold or moisture
- Basement water history
- Buyer requests repair credit
- Appraiser flags damage
- Seller wants estimate
- Final walkthrough issue
- Estate sale needs cleanup or repair
- Investor buyer wants renovation estimate
- Smoke odor or previous fire damage
- Storm damage before listing

13.7 Where They Engage

- Instagram
- LinkedIn
- Broker office referrals
- Email
- Real estate Facebook groups
- Google Search
- Open houses
- Networking events
- Past vendor lists
- YouTube education
- Direct outreach
- Referral from another agent

13.8 How They Engage

Call
Text
Email inspection report
Send photos
Request estimate
Request urgent walkthrough
Schedule seller consultation
Ask for written scope
Ask for same-week availability

13.9 When They Engage

Before listing
After inspection
During attorney review
Before closing
After buyer repair request
Before final walkthrough
When seller wants to improve value
When damage affects listing photos or showings
When repair timing impacts negotiations

13.10 Decision Criteria

Can you inspect quickly?
Can you provide a written estimate?
Can you explain without alarming the buyer?
Can you finish before closing?
Can you help seller choose repair vs credit?
Can you provide credible documentation?
Can you help protect the transaction?
Do you understand inspection timelines?
Can you communicate professionally with both agent and client?

13.11 Common Objections

“We just need a quick estimate.”
“The seller does not want to spend much.”
“We are under contract.”
“We need this before the inspection deadline.”
“We need a neutral explanation.”
“The buyer is nervous about mold.”
“Can you put this in writing?”
“We need to know if this is a deal-breaker.”
“We need this handled before closing.”

13.12 Best Messaging

“Protect the listing. Resolve inspection issues fast.”
“Fast water, mold, fire, smoke, and rebuild estimates for real estate timelines.”
“Help sellers move forward with confidence.”
“Inspection-response restoration for Chicagoland agents.”
“Clear documentation to support the next step in the transaction.”

13.13 AI Response Rules

The AI should ask:

Closing date
Inspection deadline
Party represented
Property access
Inspection report availability
Photos
Repair vs estimate-only need
Seller approval status
Whether documentation is needed for negotiation
Whether the issue affects financing, appraisal, or buyer confidence

13.14 Lead Scoring

Score 90–100

Under contract
Inspection deadline
Mold or water issue
Closing date within 30 days
Seller or buyer waiting on estimate
Agent sends inspection report
Access available

Score 70–89

Pre-listing repairs
Visible damage
Agent has repeat potential
Timeline within 60 days

Score 40–69

General vendor inquiry
No active listing
No timeline

13.15 Website Personalization

Hero: “Fast Restoration Estimates for Real Estate Transactions.”

Primary CTA: “Send Inspection Report”

Secondary CTA: “Schedule a Walkthrough”

Proof points:

Water, mold, fire, smoke, and rebuild support
Inspection-response estimates
Real estate timeline awareness
Clear documentation
Local Chicagoland service

14. Persona 9: Real Estate Buyer's Agent

14.1 Persona Overview

The buyer's agent protects the buyer. They may need a restoration expert to evaluate mold, water history, fire/smoke damage, basement moisture, or renovation costs before the buyer proceeds.

They need speed, credibility, and risk clarity.

14.2 Relevant Services

Mold inspection
Water damage assessment
Fire/smoke assessment
Basement moisture review
Rebuild estimate
Renovation estimate
Inspection response
Odor evaluation
Documentation
Post-closing repair planning

14.3 Fears

Buyer walks away unnecessarily
Buyer buys a hidden problem
Inspection issue becomes a legal issue later
Seller minimizes damage
No time to get expert opinion
Repair estimate is inaccurate
Buyer loses confidence
The issue is bigger than it appears
The buyer overpays for a property with unresolved damage

14.4 Frustrations

Inspection reports are vague.
Contractor schedules do not match contingency deadlines.
Buyers panic about mold.
Sellers delay access.
Agents need numbers quickly.
There is not enough time to explain technical issues.
Vendors do not understand due diligence timelines.
The buyer wants certainty in an uncertain situation.

14.5 Desires

Credible expert opinion
Fast inspection
Clear estimate
Buyer confidence
Negotiation support
Risk clarity
Post-closing plan if buyer proceeds
Ability to help the buyer make a rational decision
Reliable vendor relationship for future transactions

14.6 Why They Engage

They engage to protect the buyer and help the buyer make a confident decision.

Triggers include:

Inspection report mentions mold
Inspection report mentions moisture
Seller disclosure mentions prior water damage
Basement smells musty
Buyer sees stains
Fire or smoke history
Buyer wants renovation estimate
Final walkthrough reveals issue
Post-closing surprise
Concern about hidden damage

14.7 Where They Engage

Inspection referral networks

Google

Text or call

Email

Agent communities

LinkedIn

Instagram

Past vendor relationships

Real estate Facebook groups

14.8 How They Engage

Call or text

Send inspection report

Send photos

Request rush estimate

Coordinate access through showing schedule

Ask for written opinion

Request repair scope

14.9 When They Engage

During inspection period

Before repair request deadline

Before closing

After final walkthrough

Post-closing if damage was discovered

Before buyer decides whether to proceed

When buyer wants cost clarity

14.10 Decision Criteria

Can you inspect quickly?
Can you explain the risk clearly?
Can you provide cost context?
Can you help the buyer understand options?
Can you avoid unnecessary alarm?
Can you meet the inspection timeline?
Can you provide documentation for negotiation?
Can you handle work after closing?

14.11 Common Objections

“We only have a few days.”
“The buyer is nervous.”
“The seller says it is not a big deal.”
“We need a realistic estimate.”
“We do not know if this is mold.”
“We need to decide whether to ask for repairs or credit.”
“Can you explain this in simple terms?”

14.12 Best Messaging

“Give buyers clarity before they make a decision.”
“Fast expert review for water, mold, fire, smoke, and rebuild concerns.”
“Help your buyer understand risk, cost, and next steps.”
“Inspection-response support for buyer agents and their clients.”

14.13 AI Response Rules

The AI should ask:

Contingency deadline
Inspection report availability
Photos
Access window
Urgency

Buyer concern level

Whether the buyer needs remediation estimate, rebuild estimate, or risk explanation

Whether the work would happen before or after closing

Whether documentation is needed for negotiation

14.14 Lead Scoring

Score 90–100

Active buyer under contract

Inspection deadline within 7 days

Mold, water, fire, or smoke issue

Access available

Agent sends report/photos

Buyer decision depends on estimate

Score 70–89

Buyer considering offer

Known property damage

Post-closing project likely

Agent relationship potential

Score 40–69

General question

Risk explanation
Repair and rebuild options
Local Chicagoland restoration expertise

15. Persona 10: Plumbing / Sewer / Drain Partner

15.1 Persona Overview

This partner often discovers restoration needs first. They fix the source, but the customer still has wet drywall, flooring, cabinets, sewage, basement water, or mold risk.

This is one of the most valuable referral-partner categories.

The plumber, sewer company, or drain technician needs a trusted restoration partner who will protect the customer relationship and respond quickly.

15.2 Relevant Services

Water extraction
Structural drying
Sewage cleanup
Burst pipe damage cleanup
Basement flooding cleanup
Mold prevention
Mold remediation
Rebuild after plumbing damage
Emergency response
Documentation
Drywall, flooring, and cabinet rebuild

15.3 Fears

Losing the customer relationship
Restoration company making them look bad
Customer blaming plumber for damage
Slow response after referral
No referral credit
Restoration company trying to take over unrelated work
Poor communication
Customer being confused about who does what
Referral damaging their reputation

15.4 Frustrations

Customer expects plumber to handle damage.
Restoration companies do not answer quickly.
No easy referral process.
Referral outcome is unclear.
No reciprocity.
Customer does not understand source repair vs damage cleanup.
Technicians do not have time to explain restoration.
The damage is urgent, but the trade partner needs to move to the next job.

15.5 Desires

Fast trusted handoff
Customer protected
Relationship respected
Referral tracked
Possible reciprocal referrals
Simple phone/text process
Partner who makes plumber look good
Clear division of labor
Customer gratitude instead of frustration

15.6 Why They Engage

They engage when a plumbing, sewer, or drain issue creates property damage outside their scope.

Triggers include:

- Burst pipe
- Supply line leak
- Water heater failure
- Sump pump failure
- Sewer backup
- Toilet overflow
- Drain backup
- Leak behind wall
- Wet ceiling under bathroom
- Basement flooding
- Washer/dishwasher/refrigerator line leak
- Plumber stops the source but materials remain wet

15.7 Where They Engage

- Jobsite
- Phone
- Text
- QR referral card
- Direct relationship with Big Shoulders representative
- Supplier houses
- Trade groups
- Breakfast meetings
- CRM partner campaigns
- LinkedIn
- Referral landing page
- Partner outreach

15.8 How They Engage

- Immediate phone handoff
- Text photos
- Referral form
- Group text with customer
- Business card or QR code
- Dedicated partner line
- Technician introduces Big Shoulders Restoration while onsite

15.9 When They Engage

While still onsite

Immediately after stopping the source

When customer asks “now what?”

After hours

During freeze events

During storm or sewer backup periods

When water damage is visible

When sewage is present

When the job is outside their restoration capabilities

15.10 Decision Criteria

Will you respond quickly?

Will you respect my customer relationship?

Will you keep me informed?

Will you make me look good?

Will you avoid blaming my company?

Will you handle the damage professionally?

Will you reciprocate referrals when appropriate?

Will you make the handoff easy?

15.11 Common Objections

“I do not want to lose my customer.”

“I need to know you will call them right away.”

“I do not want them confused about who is doing what.”

“I need a simple process for my techs.”

“I need to know you will not make us look bad.”

“We already refer to someone else.”

“What happens after I send you the lead?”

15.12 Best Messaging

“You stop the source. We handle the damage.”

“We protect your customer relationship.”

“Fast restoration handoffs for plumbers, sewer, and drain pros.”

“Referral tracking, fast callback, and clear communication.”

“Big Shoulders Restoration helps your customer recover after the source is fixed.”

15.13 AI Response Rules

The AI should capture:

Partner company
Technician name
Customer name
Customer contact
Source repaired or still active
Damage type
Urgency
Photos
Customer consent
Referral attribution
Whether partner wants update
Whether this is a new partner or existing partner

15.14 Lead Scoring

Score 95–100

Active referral from trade
Customer contact provided
Source repaired
Water or sewage damage
Photos available
Immediate response requested
Technician still onsite

Score 70–89

Partner intro
Recurring referral potential
No active job yet
Trade company wants partner conversation

Score 40–69

Loose networking
No referral process
No current need

15.15 Website Personalization

Hero: “Restoration Partner for Plumbers, Sewer, and Drain Companies.”

Primary CTA: “Refer a Customer Now”

Secondary CTA: “Become a Partner”

Proof points:

We respect your customer relationship
Fast callback
Water and sewage cleanup
Documentation
Rebuild support
Referral tracking
Simple handoff

16. Persona 11: HVAC / Roofing / Electrical Partner

16.1 Persona Overview

These trades frequently uncover related property damage.

Examples:

Roof leaks causing ceiling or attic damage
HVAC condensation causing water damage
Electrical hazards near water
Smoke damage near wiring
Storm-related interior damage
Attic mold
Crawl space moisture

They need a partner who understands scope boundaries and responds fast.

16.2 Relevant Services

Water damage restoration
Mold remediation
Storm leak cleanup
Attic mold remediation
Ceiling and wall drying
Fire/smoke cleanup
Rebuild
Odor removal
Emergency stabilization
Documentation
Crawl space support

16.3 Fears

Customer blames them
Damage is outside their license or scope
Restoration company takes customer relationship
Unsafe conditions
Referral reflects badly on them
No fast response
Scope confusion
Customer expects them to solve a restoration issue

16.4 Frustrations

They identify damage but cannot solve it.
Customers ask for answers outside their scope.
They do not have a trusted restoration partner.
They need quick jobsite decisions.
They need someone who will not disrupt their own work.
They do not want to be pulled into damage documentation.
They need to keep their schedule moving.

16.5 Desires

Trusted referral partner
Clear scope boundaries
Customer helped fast
Reciprocal relationship
Professional handoff
Confidence that restoration will not create conflict
Fast answer from a real person
Customer appreciation

16.6 Why They Engage

They engage when they discover water, mold, fire/smoke, or storm damage during their own service.

Triggers include:

Roof leak
Storm damage
Attic moisture
Attic mold
HVAC condensation leak
Water near electrical
Smoke damage
Ceiling stain
Crawl space moisture
Wall or ceiling damage caused by source issue
Post-storm interior water

16.7 Where They Engage

Jobsite
Direct phone/text
Trade groups
Supplier houses
LinkedIn
Referral portal
Co-branded education
Local networking
Direct sales outreach
Partner events

16.8 How They Engage

Call or text named Big Shoulders contact
Send photos
Introduce customer by text
Use QR referral form
Ask for emergency response
Provide customer with partner card
Send email handoff

16.9 When They Engage

During service call
After roof leak repair
During HVAC condensation issue
During electrical safety concern
After storm events
During attic or crawl space inspections
When customer asks “who fixes the damage?”
When the issue is urgent but outside their trade

16.10 Decision Criteria

Will you respond fast?
Will you respect our scope?
Will you avoid confusing the customer?
Will you protect our relationship?
Will you communicate clearly?
Will you document what you do?
Will you send referrals back when appropriate?

16.11 Common Objections

“We already have someone we refer to.”
“We do not want to lose the customer.”
“We need fast response.”
“We need an easy way for techs to refer.”
“We need to know you will not blame our work.”
“We do not want to get involved in restoration paperwork.”
“Can you handle rebuild too?”

16.12 Best Messaging

“When your job reveals damage, Big Shoulders Restoration handles the restoration.”
“Fast handoffs for roof, HVAC, electrical, and storm-related damage.”
“We support your customer without stepping on your scope.”
“Protect your customer relationship while solving the damage problem.”

16.13 AI Response Rules

The AI should identify:

Trade type
Source issue
Whether source is repaired
Safety concerns
Photos
Customer consent

Referral attribution
Urgency
Whether the partner wants an update
Whether this is a one-time referral or partnership opportunity

16.14 Lead Scoring

Score 95–100

Active customer referral
Water, mold, smoke, or storm damage
Trade partner still onsite
Photos available
Customer wants immediate response
Safety concern involved

Score 70–89

Partner wants referral relationship
Recurring potential
Trade company has high-volume service calls

Score 40–69

General networking
No current lead
No clear referral path

16.15 Website Personalization

Hero: “Restoration Support for HVAC, Roofing, Electrical, and Storm-Related Damage.”

Primary CTA: “Refer a Customer”

Secondary CTA: “Set Up a Partner Relationship”

Proof points:

Fast handoff
Customer relationship protection

Water, mold, fire, smoke, and rebuild support
Clear communication
Referral tracking

17. Persona 12: General Contractor / Remodeler / Trades Partner

17.1 Persona Overview

General contractors, remodelers, flooring companies, painters, drywall companies, and other trades may uncover water damage, mold, smoke damage, or structural moisture during demolition or renovation.

Some may need a restoration partner to handle mitigation or remediation before they continue their own work.

They care deeply about project continuity, customer ownership, and scope control.

17.2 Relevant Services

Mold remediation
Water damage mitigation
Fire/smoke cleanup
Demolition and containment
Drying
Rebuild collaboration
Crawl space work
Odor removal
Documentation
Specialty restoration before renovation
Moisture assessment
Post-damage reconstruction

17.3 Fears

Project delay
Customer blame
Scope creep
Mold liability
Unsafe worksite
Restoration company taking over project
Insurance complexity
Losing margin or control
Customer losing confidence
Hidden damage derailing schedule

17.4 Frustrations

Hidden damage appears mid-project.
Customer does not understand why project must stop.
Mold or water issues require specialty handling.
Insurance may get involved unexpectedly.
Restoration companies do not coordinate with contractors.
The contractor is blamed for something discovered during demo.
The contractor needs a specialist but does not want to lose the job.

17.5 Desires

Specialty partner
Clear division of labor
Fast remediation
Project continuity
Customer confidence
Reciprocal referrals
No client stealing
Documentation when needed
Ability to continue the project safely
Partner who respects their role

17.6 Why They Engage

They engage when damage or contamination appears during a construction or renovation project.

Triggers include:

- Mold discovered during demo
- Wet materials behind walls
- Old leak uncovered
- Fire or smoke residue discovered
- Crawl space issue
- Moisture under flooring
- Basement project reveals water issue
- Customer asks about insurance
- Work must pause until remediation is done

17.7 Where They Engage

- Jobsite
- Phone/text
- Contractor networks
- Supplier houses
- LinkedIn
- Trade groups
- Referral agreements
- Direct outreach
- Partner meetings
- Co-branded education

17.8 How They Engage

- Call from jobsite
- Send photos
- Request inspection
- Refer customer directly
- Bring Big Shoulders Restoration in as a specialty partner
- Ask for documentation
- Request emergency remediation
- Schedule project coordination call

17.9 When They Engage

During demolition

After discovering mold

After uncovering wet materials

Before continuing rebuild

When documentation is needed

When customer asks for restoration expertise

When safety or contamination concerns pause work

When a project deadline is threatened

17.10 Decision Criteria

Will you respect my customer relationship?

Can you help quickly?

Will you work within a clear scope?

Will you avoid taking over my project?

Can you document the issue?

Can you help me keep the project moving?

Can you communicate professionally with the customer?

Will you refer work back when appropriate?

17.11 Common Objections

"I do not want to lose control of the project."

"I just need a specialist for this part."

"The customer is already stressed."

"We need to keep the project moving."

"I need clear boundaries."

"I do not want the customer confused."

"Can you document this without blowing up the job?"

17.12 Best Messaging

"Keep your project moving when hidden damage appears."

"Specialty restoration support for remodelers and contractors."

“We handle mitigation and remediation while respecting your customer relationship.”

“Bring Big Shoulders Restoration in when water, mold, fire, smoke, or hidden damage interrupts the project.”

17.13 AI Response Rules

The AI should capture:

- Contractor type
- Project stage
- Damage discovered
- Whether work has paused
- Customer consent
- Insurance involvement
- Desired role: referral partner, specialty partner, or direct customer relationship
- Referral attribution
- Timeline pressure
- Photos or reports

17.14 Lead Scoring

Score 95–100

- Active project stopped by mold/water/fire/smoke issue
- Customer contact available
- Contractor wants fast inspection
- Photos available
- Project deadline at risk
- Recurring partnership potential

Score 70–89

- Contractor wants partner relationship
- Specialty support needed soon
- Possible recurring referral source

Score 40–69

General networking
No current project
No clear next step

17.15 Website Personalization

Hero: “Specialty Restoration Support for Contractors and Remodelers.”

Primary CTA: “Bring Us Into a Project”

Secondary CTA: “Set Up a Trade Partnership”

Proof points:

Scope respect
Fast inspection
Mold, water, fire, smoke, and rebuild expertise
Customer relationship protection
Project continuity

18. Universal Lead Scoring System

18.1 Score 90–100: Immediate Emergency / High-Value Action

Standing water
Active leak
Sewage
Fire or smoke event
Multiple units affected
Tenant displacement
HOA or property manager emergency
Insurance claim involved
Trade referral with customer contact
Real estate closing deadline
Customer asks for same-day response
Address and photos provided
Property manager or landlord with multiple properties

Safety concern
Electrical concern
Ceiling collapse or structural concern

18.2 Score 75–89: High-Value Urgent Opportunity

Visible mold
Musty smell after water event
Finished basement affected
Landlord or property manager lead
HOA or condo issue
Real estate inspection deadline
Insurance agent referral
Trade partner introduction
Rebuild needed after mitigation
Tenant complaint
Recurring moisture issue
Pre-listing repair deadline

18.3 Score 55–74: Strong Scheduled Opportunity

Mold inspection
Crawl space concern
Renovation after damage
Basement moisture
Pre-listing repair
Rental turnover
Preventative inspection
Partner intro with no active job
Homeowner considering rebuild
Landlord planning unit repairs

18.4 Score 35–54: Nurture Opportunity

Early research
Vague issue
No timeline

Price shopping
Old damage
Education request
No photos
No property address
No urgency

18.5 Score 0–34: Low Fit / Low Intent

Outside service radius
No property damage need
Unresponsive
Only wants DIY advice
No permission to access property
No decision-maker contact
No timeline
Not a relevant service request

18.6 Strategic Value Modifiers

Add 10–20 points for:

Property manager
Insurance agent
Real estate agent
Trade partner
Landlord with multiple properties
HOA or condo board
Repeat customer
Referral source
High-value property type
Finished basement
Multi-unit building
Active insurance claim
Photos uploaded
Call answered live
Decision-maker identified
Urgent timeline
Partner relationship potential

Subtract 10–30 points for:

Outside service area

No urgency

No property access

No decision-maker contact

Only wants free advice

Unclear ownership

No response after multiple touches

No active issue

No service fit

19. Channel Strategy by Persona

Persona	Primary Channels	Secondary Channels	Best CTA
Emergency Homeowner	Google Ads, Local Services Ads, Google Business Profile, SEO, phone	Nextdoor, Facebook, YouTube, retargeting	Call now
Preventative Homeowner	SEO, YouTube, blog, Google Business Profile	Facebook, email, direct mail	Schedule inspection
Renovation/Rebuild Homeowner	SEO, before-and-after gallery, retargeting	Instagram, Facebook, email	Request rebuild consult
Landlord	Google, trade referrals, investor groups	Email, direct mail, LinkedIn	Coordinate rental restoration

HOA Board	Property manager referrals, LinkedIn, direct mail	Webinars, email, search	Request board-ready scope
Property Manager	LinkedIn, email, sales outreach	Events, calls, direct mail	Request vendor packet
Insurance Agent	LinkedIn, email, office visits	Lunch-and-learns, networking	Refer a client
Listing Agent	Instagram, LinkedIn, broker visits	Email, Facebook groups	Send inspection report
Buyer's Agent	Broker referrals, Google, text/call	Email, LinkedIn	Request fast review
Plumbing/Sewer Partner	Direct sales, jobsite cards, text	Supplier houses, referral portal	Refer customer now
HVAC/Roofing/Electrical Partner	Direct outreach, text, trade groups	LinkedIn, supplier houses	Call partner line
GC/Remodeler Partner	Contractor networks, direct calls	Supplier houses, LinkedIn	Bring us into the project

20. Messaging Matrix

20.1 Universal Brand Messaging

“Fast local response when property damage cannot wait.”

“Big Shoulders Restoration helps Chicagoland property owners move from emergency to fully restored.”

“Water, mold, fire, smoke, storm, sewage, rebuild, and renovation support.”

“One local team from emergency cleanup through reconstruction.”

“Clear documentation. Calm communication. Professional restoration.”

20.2 Homeowner Messaging

“Protect your home before damage spreads.”

“Fast local help when water, mold, fire, smoke, or sewage damage cannot wait.”

“From emergency cleanup to full rebuild.”

“Know what to do next.”

20.3 Landlord Messaging

“Protect the asset. Calm the tenant. Document the damage.”

“Fast rental property restoration with tenant coordination.”

“Restore the unit and reduce vacancy risk.”

20.4 HOA Messaging

“Board-ready documentation for shared property damage.”

“Emergency stabilization and clear communication for associations.”

“Reduce confusion among owners, residents, boards, and managers.”

20.5 Property Manager Messaging

“Less vendor chasing. More resolved problems.”

“Emergency restoration built for property managers.”

“Fast response, clear updates, documentation, and rebuild support.”

20.6 Insurance Agent Messaging

“Client-first restoration support without coverage promises.”

“Fast response and professional documentation for your policyholders.”

“Help your clients act quickly and document the damage properly.”

20.7 Real Estate Agent Messaging

“Protect the transaction.”

“Fast inspection-response estimates for water, mold, fire, smoke, and rebuild issues.”

“Help buyers and sellers move forward with confidence.”

20.8 Trade Partner Messaging

“You fix the source. We handle the damage.”

“We protect your customer relationship.”

“Fast handoffs. Clear communication. Referral tracking.”

21. Objection Handling Knowledge Base

21.1 Objection: “Should I call insurance first?”

Recommended response:

“You can contact your insurance carrier, but if there is active water, sewage, smoke, or ongoing damage, mitigation may need to begin quickly to prevent further damage. Big Shoulders Restoration can document conditions, take photos, and provide scope information. Coverage depends on your policy, the cause of loss, endorsements, exclusions, and carrier review.”

21.2 Objection: “Can I dry it myself?”

Recommended response:

“Small surface spills may dry with basic cleanup, but water inside walls, under flooring, behind cabinets, or in finished basements can remain hidden. Professional drying uses moisture detection, extraction, air movement, dehumidification, and documentation to help confirm materials are drying properly.”

21.3 Objection: “Will insurance cover it?”

Recommended response:

“Coverage depends on your policy and the cause of loss. Sudden pipe or appliance losses may be treated differently than outside floodwater, groundwater seepage, sewer backup, or maintenance-related damage. Big Shoulders Restoration can help document the damage and scope, but the insurance carrier determines coverage.”

21.4 Objection: “I need multiple bids.”

Recommended response:

“That makes sense for non-emergency reconstruction decisions. If there is active water, sewage, smoke, or mold risk, the first priority is stabilizing the property and documenting conditions. Emergency mitigation and rebuild scope can be handled as separate decisions when needed.”

21.5 Objection: “My handyman can do it.”

Recommended response:

“For cosmetic repairs, that may be true. For water, sewage, mold, smoke, or hidden moisture, the risk is that materials are repaired before they are properly dried or remediated. Big Shoulders Restoration can inspect and determine what actually needs restoration versus simple repair.”

21.6 Objection: “We already have a vendor.”

Recommended response for property managers:

“Understood. Many property managers keep more than one emergency vendor because availability, response time, communication, and rebuild capacity matter during high-volume events. Big Shoulders Restoration can start as a backup vendor or support overflow work.”

21.7 Objection: “I do not want you taking my customer.”

Recommended response for trades:

“That is exactly why our trade partnerships are structured around relationship protection. You own the customer relationship. Big Shoulders Restoration handles the restoration scope, communicates clearly, and keeps the referral source connected to the job.”

21.8 Objection: “We need board approval.”

Recommended response:

“That makes sense. If emergency stabilization is needed, Big Shoulders Restoration can help document the issue, separate immediate mitigation from longer-term repairs, and provide board-ready information to support the decision process.”

21.9 Objection: “We just need an estimate for closing.”

Recommended response:

“Big Shoulders Restoration can review the inspection issue, photos, and timeline to help provide a restoration or rebuild estimate. If the transaction has a deadline, send the inspection report and closing timeline so the request can be prioritized appropriately.”

22. AI Classification Rules

Every inbound message, call transcript, form fill, chatbot conversation, email, or referral should be classified into standard fields.

24. Website Personalization Rules

Rule 1: Emergency Behavior

If a visitor lands on water, sewage, fire, smoke, or emergency content from mobile search, show:

Primary CTA: Call Now

Secondary CTA: Upload Photos

Trust message: Local response, emergency availability, documentation, one team from cleanup through rebuild

Rule 2: Mold Education Behavior

If a visitor reads mold content or uses keywords like “musty smell,” show:

Primary CTA: Schedule Mold/Moisture Inspection

Secondary CTA: Upload Photos

Trust message: Honest inspection, remediation expertise, rebuild support

Rule 3: Property Manager Behavior

If a visitor lands on property manager content or comes from LinkedIn/email campaign, show:

Primary CTA: Request Vendor Packet

Secondary CTA: Schedule Intro

Trust message: COI/W-9, documentation, emergency protocol, tenant/resident communication

Rule 4: Insurance Agent Behavior

If a visitor lands from an agent campaign, show:

Primary CTA: Refer a Client

Secondary CTA: Request Partner Info

Trust message: Coverage-neutral, documentation-focused, client-first response

Rule 5: Real Estate Behavior

If a visitor lands from a real estate campaign, show:

Primary CTA: Send Inspection Report

Secondary CTA: Request Fast Estimate

Trust message: Closing timeline support, water/mold/fire/smoke/rebuild estimates

Rule 6: Trade Partner Behavior

If a visitor lands from a trade QR code or partner campaign, show:

Primary CTA: Refer Customer Now

Secondary CTA: Become a Partner

Trust message: Protect customer relationship, fast response, clear communication, referral tracking

Rule 7: Landlord Behavior

If a visitor references tenant, rental, unit, or landlord content, show:

Primary CTA: Coordinate Rental Property Restoration

Secondary CTA: Send Photos

Trust message: Tenant coordination, remote updates, documentation, rent-ready support

Rule 8: HOA Behavior

If a visitor references board, HOA, condo, common area, or association content, show:

Primary CTA: Request Board-Ready Documentation

Secondary CTA: Request Emergency Stabilization

Trust message: Multi-stakeholder communication, common-area restoration, documentation, COI/W-9

25. Nurture Sequences

25.1 Emergency Homeowner Sequence

Day 0

“Water, mold, fire, smoke, or sewage damage can move quickly. If the issue is active, call now. If safe, send photos so Big Shoulders Restoration can understand the situation.”

Day 1

“What happens during emergency mitigation: inspection, documentation, extraction/cleanup, drying, monitoring, and rebuild planning.”

Day 3

“Why hidden moisture matters in Chicagoland basements, walls, and flooring.”

Day 7

“Rebuild options after damage: repair it back or improve the space.”

Day 14

“Seasonal prevention checklist: sump pump, downspouts, humidity, roof leaks, plumbing maintenance.”

25.2 Preventative Homeowner Sequence

Day 0

“Concerned about a musty smell, stain, or possible mold? Big Shoulders Restoration can help inspect and explain the next step.”

Day 2

“Common signs of hidden moisture: recurring odor, staining, peeling paint, soft materials, condensation, or past leaks.”

Day 5

“Before finishing a basement or remodeling, make sure moisture problems are addressed first.”

Day 10

“Schedule a moisture or mold inspection to understand what is happening before the issue spreads.”

25.3 Rebuild Homeowner Sequence

Day 0

“Cleanup is only part of recovery. Big Shoulders Restoration can help rebuild and restore the affected space.”

Day 2

“Repair vs renovation: when to restore what was there and when to improve the space.”

Day 5

“Send your photos or scope so we can help plan next steps.”

Day 10

“Schedule a rebuild consultation to move from damage to finished space.”

25.4 Landlord Sequence

Day 0

“We can coordinate access with the tenant and send photo updates.”

Day 1

“Rental property restoration checklist: document, stabilize, communicate, rebuild.”

Day 3

“How to reduce tenant complaints after water or mold issues.”

Day 7

“Keep Big Shoulders Restoration as your emergency restoration partner for rental properties.”

25.5 HOA Sequence

Day 0

“Emergency stabilization and board-ready documentation are available.”

Day 2

“Common-area vs unit damage: what to document before decisions.”

Day 5

“How to reduce owner confusion during water, mold, fire, or storm events.”

Day 10

“Request a vendor packet or board presentation.”

25.6 Property Manager Sequence

Day 0

“Fast response, photo updates, and documentation for your properties.”

Day 2

“Vendor packet available: COI, W-9, emergency protocol, service overview.”

Day 5

“How Big Shoulders Restoration helps reduce resident and owner escalation.”

Day 10

“Schedule a portfolio intro or use Big Shoulders Restoration as a backup emergency vendor.”

25.7 Insurance Agent Sequence

Day 0

“We help clients act quickly and document damage without making coverage promises.”

Day 2

“Water damage language matters: document the source, avoid assumptions, and let the carrier determine coverage.”

Day 5

“Seasonal client education: frozen pipes, sump pump failures, sewer backup, storms.”

Day 10

“Refer a client or request a co-branded emergency checklist.”

25.8 Real Estate Agent Sequence

Day 0

“Inspection issue? Send the report for fast review.”

Day 2

“Water and mold concerns do not have to stop a deal if handled quickly and clearly.”

Day 5

“Pre-listing restoration checklist for sellers.”

Day 10

“Save Big Shoulders Restoration as your inspection-response vendor.”

25.9 Trades Sequence

Day 0

“You fix the source. Big Shoulders Restoration handles the damage.”

Day 2

“How our referral process protects your customer relationship.”

Day 5

“Co-branded customer handoff cards and referral tools are available.”

Day 10

“Set up a direct referral process for your team.”

26. Sales Enablement Discovery Questions

26.1 Homeowner

What happened?
When did it start?
Is water still entering?
Is sewage involved?
Is electricity affected?
What rooms are affected?
Is this a finished basement or living space?
Have you contacted insurance?
Have you taken photos?
Is everyone safe?
Do you need immediate response?
Do you need rebuild after cleanup?

26.2 Preventative Homeowner

What are you noticing?
Is there a smell, stain, visible growth, or moisture?
Where is the issue located?
Has there been a previous leak?
Is the area a basement, attic, crawl space, bathroom, or kitchen?
Have you tried cleaning or painting over it?
Are you planning to remodel or sell?
Do you have photos?

26.3 Rebuild Homeowner

Has mitigation or remediation already been completed?
What rooms are affected?
Do you have an insurance estimate or scope?
Do you want repair-only or upgrades?
What is your ideal timeline?
Are materials already removed?

Do you have photos?
Is the space currently usable?

26.4 Landlord

Is the property occupied?
Who is the tenant contact?
Do we have permission to enter?
What unit is affected?
Is rent-ready status at risk?
Are multiple units affected?
Are you local or remote?
Do you need photos and documentation?
Is insurance involved?
Is there a move-in or turnover deadline?

26.5 HOA

Is the damage in a unit, common area, or both?
How many units are affected?
Who can authorize emergency mitigation?
Is there a property manager?
Is association insurance involved?
Do you need a board packet?
Is a meeting scheduled?
Are owners or residents actively complaining?
Do you need COI/W-9?

26.6 Property Manager

How many properties do you manage?
What property types?
What is the current emergency?
What vendor requirements do you have?
Who needs updates?
How do you prefer communication?
Do you need COI/W-9?

Would you like an emergency protocol on file?
Are you looking for a primary, backup, or overflow vendor?
What has frustrated you with restoration vendors in the past?

26.7 Insurance Agent

Is the client safe?
What type of loss did they report?
Do we have permission to contact them?
What is the best client contact number?
Is there active water, sewage, fire, or smoke?
Should we update you once contact is made?
Do you need documentation support?
Has the client already filed a claim?
Is there anything we should avoid saying or clarify carefully?

26.8 Real Estate Agent

Are you representing buyer or seller?
Is the property under contract?
What is the inspection deadline?
What is the closing date?
Can you send the inspection report?
Do you need estimate-only or work performed?
Who authorizes access?
Is the issue affecting negotiations?
Do you need a written scope?
Is this pre-listing, under contract, or post-closing?

26.9 Trade Partner

What trade are you in?
Are you onsite now?
Was the source repaired?
What damage remains?
Do we have customer permission to call?
Should we keep you updated?

Is this a one-time referral or would you like to set up a partnership?
Do you have photos?
Is sewage, mold, water, fire, or smoke involved?
Does the customer need emergency response?

28. AI Marketing Content Generation Rules

The AI should generate content based on persona, service, urgency, and engagement stage.

28.1 Required Inputs

Persona
Damage type
Urgency
Channel
Stage
Offer
Location
Referral source
Tone
CTA

28.2 AI Prompt Template

“Generate a [channel] message for [persona] in [location] dealing with [damage type]. The prospect is in [engagement stage]. Use Big Shoulders Restoration’s tone: local, calm, fast, professional, insurance-aware, and clear. Avoid scare tactics and avoid promising insurance coverage. CTA: [CTA].”

28.3 Example Homeowner Output

“Water in your basement? Big Shoulders Restoration is a local Chicagoland team available for emergency water cleanup, drying, documentation, and rebuild. If water is active or materials are wet, call now so we can help stop the damage before it spreads.”

28.4 Example Property Manager Output

“When a resident reports water or mold, you need more than a contractor. You need fast response, documentation, and clear updates. Big Shoulders Restoration supports property managers with emergency restoration, photo documentation, rebuild, and communication your team does not have to chase.”

28.5 Example Insurance Agent Output

“When your client calls about water, fire, smoke, mold, or sewage damage, Big Shoulders Restoration can help them act quickly and document the damage without making coverage promises. We focus on emergency response, clear communication, and client-first support.”

28.6 Example Real Estate Agent Output

“Inspection issue threatening the timeline? Big Shoulders Restoration can review water, mold, fire, smoke, and rebuild concerns quickly so buyers and sellers have clearer next steps before the deadline.”

28.7 Example Trade Partner Output

“You fixed the leak. We’ll handle the damage. Big Shoulders Restoration gives plumbers, sewer pros, roofers, HVAC companies, electricians, and contractors a fast restoration partner who respects the customer relationship and keeps the referral source informed.”

29. Measurement Framework

29.1 Core KPIs

Lead volume by persona
Lead score by source
Call answer rate
Time to first response
Emergency conversion rate
Inspection booking rate
Estimate close rate
Referral source conversion
Partner referrals by month
Cost per booked job
Revenue by persona
Gross margin by service/persona

Jobs per account
Repeat emergency calls
Account retention
Emergency protocol adoption
Preferred vendor conversion

Insurance Agents

- Client referrals
- Referral-to-job conversion
- Agent repeat referral rate
- Education content engagement
- Client contact speed
- Documentation satisfaction

Real Estate Agents

- Inspection report submissions
- Estimate turnaround time
- Pre-closing conversion
- Repeat agent referrals
- Pre-listing repair opportunities
- Post-closing project opportunities

Trades

- Partner signups
- Referral volume
- Referral close rate
- Reciprocal referrals
- Referral source retention
- Customer handoff speed
- Partner activity rate

30. Implementation Roadmap

Phase 1: Foundation

- Build persona records in CRM.
- Create lead scoring rules.
- Create intake forms by persona.
- Create CRM tags.
- Create emergency routing rules.
- Create call scripts.
- Create website CTAs by persona.
- Create partner source tracking.
- Create documentation templates.

Phase 2: Website and Content

Create dedicated pages:

Homeowners
Landlords
Property Managers
HOAs / Condo Associations
Insurance Agents
Real Estate Agents
Trade Partners
Water Damage
Mold Remediation
Fire/Smoke Restoration
Sewage Cleanup
Storm Damage
Rebuild/Renovation
Emergency Response
Crawl Space / Moisture
Referral Partners

Phase 3: AI Assistant and Automation

Train chatbot on persona classification.
Add photo-upload workflow.
Create emergency escalation rules.
Create partner referral intake.
Create nurture sequences.
Create AI content prompt library.
Create objection handling snippets.
Create sales handoff summaries.
Create lead score routing.
Create service/persona-based personalization logic.

Phase 4: Referral Ecosystem

- Build property manager vendor packet.
- Build insurance agent partner packet.
- Build real estate agent packet.
- Build trade partner program.
- Build co-branded checklists.
- Build direct referral line or referral form.
- Track referral attribution.
- Create quarterly referral partner touchpoints.
- Create thank-you and follow-up process.
- Create partner performance dashboard.

Phase 5: Optimization

- Review lead scoring monthly.
- Compare close rates by persona.
- Compare job value by source.
- Identify top referral partners.
- Adjust ad spend by persona value.
- Create more content for high-converting persona/service combinations.
- Use completed jobs to create case studies and before/after proof.
- Audit chatbot classifications.
- Review lost jobs and objection patterns.
- Improve nurture based on actual conversion data.

31. AI-Ready Knowledge Base Schema

Use this structure for every persona record:

```
JSON
{
  "persona_name": "",
  "persona_group": "",
  "buyer_type": "direct_buyer | referrer | b2b_partner | influencer
| decision_maker",
  "primary_services": [],
  "property_context": [],
```

```
"primary_fears": [],
"primary_frustrations": [],
"primary_desires": [],
"why_they_engage": "",
"where_they_engage": [],
"how_they_engage": [],

33. Final Strategic Recommendations

Recommendation 1: Separate emergency buyers from relationship personas

A homeowner with standing water needs immediate response.

A property manager needs reliability.

An insurance agent needs client protection and coverage-neutral communication.

A trade partner needs customer relationship protection.

Each audience requires a different CTA, sales motion, and message.

Recommendation 2: Make “one team from emergency response through rebuild” a central differentiator

This is valuable across nearly every persona.

Homeowners want less chaos.

Landlords want rent-ready property.

Property managers want fewer vendors.

HOAs want clearer documentation.

Real estate agents want faster transaction support.

Trades want a trusted partner.

Insurance agents want clients supported professionally.

Recommendation 3: Own Chicagoland basement, water, mold, and storm education

Big Shoulders Restoration should become a local authority on:

Basement flooding

Sump pump failures

Sewer backups

Frozen pipes

Heavy rain events

Mold after water damage

Finished basement restoration

Rental property water damage

Condo and HOA water issues

Real estate inspection moisture concerns

Recommendation 4: Be insurance-aware but never coverage-promising

This protects Big Shoulders Restoration, referral partners, and customers.

Use coverage-neutral language and focus on:

- Documentation
- Mitigation
- Photos
- Moisture readings
- Scope clarity
- Communication
- Carrier review
- Policy-specific decisions

Recommendation 5: Build the referral partner ecosystem aggressively

The fastest path to durable lead flow is not only advertising.

Big Shoulders Restoration should build dedicated relationship programs for:

- Plumbers
- Sewer and drain companies
- HVAC companies
- Roofers
- Electricians
- General contractors
- Remodelers
- Insurance agents
- Property managers
- Real estate agents
- Landlords
- HOAs

Each should have:

- Dedicated landing page
- Referral CTA
- Partner packet

Follow-up sequence
CRM tag
Referral attribution
Sales owner
Quarterly touchpoint
Partner-specific content

Recommendation 6: Use personas as AI routing infrastructure

These personas should be embedded into:

Website chatbot
Call center scripts
CRM automations
Email/SMS nurture
Ad targeting
Landing page personalization
Sales enablement
Referral partner outreach
Content generation
Lead scoring
Job follow-up
Review generation
Partner tracking
AI-generated marketing content

34. Clean Usage Rule for the Knowledge Base

All future materials should refer only to:

Big Shoulders Restoration

Avoid any mention of previous names, franchise language, or franchise comparisons.

Approved language:

“Big Shoulders Restoration is a locally owned Chicagoland restoration and rebuild company.”

“Big Shoulders Restoration serves homeowners, landlords, HOAs, property managers, insurance agents, real estate agents, and trade partners.”

“Big Shoulders Restoration provides water, mold, fire, smoke, storm, sewage, emergency response, rebuild, renovation, and documentation support.”

“Big Shoulders Restoration helps customers move from property damage to full recovery with clear communication and local accountability.”

Email to Julia (Project Manager)

Subject: URGENT: Project Management Lead for Q3 Tech Launch & BSR Campaign

Hi Julia,

I need you to take the lead on project managing the entire, integrated Q3 marketing campaign and the Big Shoulders Growth Engine build-out. This is a critical role to ensure we hit our revenue and partner acquisition goals.

Your scope covers everything from the initial **Project Exodus Scoping (M0)** to the **Tech Brand Launch (Phase 1)** and the **BSR Hard Launch (Phase 2)**. This includes coordinating our internal team (Developer/Creator), our 3rd party marketing company, and tracking the core Milestones (M0-M5) for the Growth Engine MVP.

I’ve outlined the entire plan, a detailed week-by-week schedule, and a contact/execution checklist below in the new section, **Q3 Integrated Campaign Project Management Plan**. Your first task is to review this plan and establish daily check-in points with the Developer and the 3rd Party Marketing Company.

Let’s discuss this 1:1 in the next 2 hours to confirm your schedule and capacity.

Thanks,
Robby Schoenhof
Owner | Big Shoulders Restoration

Q3 Integrated Campaign Project Management Plan

1. Core Project Goal and Financial Outcome (\$)

The goal is to successfully execute the two-phased Q3 launch, driving licensing revenue from Phase 1 (Technology/BSR CHI) and high-value restoration job revenue from Phase 2 (Big Shoulders Restoration).

Primary Financial Outcome (KPI Focus): Achieve **M5 Completion** to enable real-time **Revenue by Persona** and **Revenue by Partner** reporting, demonstrating a clear ROI for the Growth Engine investment.

2. Key Points of Contact and Execution Check-In

Julia (Project Manager) is responsible for coordinating the three execution layers and ensuring Milestone acceptance criteria are met.

Role	Responsibility	Execution Focus	Julia's Check-In Cadence
Owner (Robby Schoenhof)	Strategic approval, ultimate authority on the Human Approval Queue (E5) , high-level budget.	Approving all outbound marketing copy and signing off on Milestone Completion (M0-M5).	Daily 15-minute sync, or when E5 Approvals are submitted.
Developer / Creator	Growth Engine MVP Delivery (E1-E9) , code implementation, Claude/v0 deployment, and bug fixes.	Delivering all Epics (E1-E9) on the linear board and integrating the Persona Knowledge Base (E2).	Daily 30-minute stand-up focused on In Progress tasks and Dependencies .
3rd Party Marketing Co.	Execution Layer , ad spend management, social media publishing, and reporting ingestion.	Executing Agency Briefs (E4) for the Apple-style teaser (Phase 1) and BSR hard launch (Phase 2) using approved content from E5.	Twice-weekly brief review (Mondays/Wednesdays) and end-of-week reporting check-in.

3. Week-by-Week Q3 Execution Guide

Week	Phase Focus	Key Conversation / Check-In Focus	Completion Checklist
Week 1	M0 & M1 START: Project Exodus Scoping & Data Foundation	Dev: M1 kick-off, review Data Model (E1) and Partner Scoring (E7) prompts. Owner: Finalize Fundraising Target (\$) for Project Exodus (M0).	M0: Exodus Scoping, Matterport scan, and CRM record created. E1/E7: Data Model and Partner Score (MVP) schema delivered by Developer.
Week 2	M1 Complete & M2 START: Tech Launch Readiness / Approval Workflow	Dev: Finalize Partner/Lead Scoring (E7) and deliver Human Approval Queue (E5) MVP . Agency: Review content drafts for Phase 1 Teaser Campaign assets.	M1: Data Foundation & Tech Readiness complete (Scores, CRM, Dashboard MVP). E5: Human Approval Queue is fully functional.
Week 3	M2 COMPLETE & Phase 1 Teaser Prep	Owner: Approve Phase 1 Teaser Campaign copy in E5 . Agency: Receive approved Agency Brief (E4) and prepare for launch execution. Dev: Deliver initial Website Personalization Rules (E6) (Rules 4 & 6).	M2: Human Approval & Digital Handoff Complete (E5, E6 MVP, Agency Briefing ready). Agency: Teaser campaign assets built and scheduled for Week 4 launch.
Week 4	PHASE 1 LAUNCH & M3 START: AI Automation Core	Agency: Launch Apple-Style Teaser (LinkedIn/Tech Network). Dev: Focus on Next Best Action Engine (E8) MVP delivery. Owner: Track sign-ups for Pilot Revenue Pipeline .	Phase 1: Teaser Campaign launched and tracking impressions/pilot sign-ups. E8: Next Best Action (MVP) functionality is working (recommending calls/emails).
Week 5	M3 COMPLETE: AI Guidance System Live	Dev: Deliver full AI Content Prompt Library (E6) . PM: Audit Next Best Action usage by BD team to ensure efficiency (E8 adoption). Owner: Review and provide feedback on AI-drafted content.	M3: AI Automation Core complete (E8, E6, E2 Integration). BD Team: Utilizing Next Best Action recommendations daily.
Week 6	M4 START: Referral Ecosystem Build	Dev: Focus on Partner Module (E1) enhancements and Partner Health Score (E7) logic. PM:	E1/E7: Partner Module updated with Partner Health Score logic.

Week	Phase Focus	Key Conversation / Check-In Focus	Completion Checklist
		Identify high-potential B2B partners based on current Partner Scores.	Campaigns: Draft all Phase 2 BSR Hard Launch assets (E4).
Week 7	M4 BUILD: Referral Ecosystem Tools	Dev: Deliver Trade Partner Referral Intake Form (E3) and workflow. Agency: Review and submit Phase 2 BSR Hard Launch campaign copy into E5 .	E3: Referral Intake Form is live and tracking attribution. Agency: Phase 2 assets submitted to E5 (Approval Queue) .
Week 8	M4 COMPLETE: BSR Hard Launch Readiness	Owner: Approve all Phase 2 BSR Hard Launch ad copy, landing page updates, and sequences in E5 . PM: Confirm all B2B partners are scored and ready for the launch communication.	M4: BSR Hard Launch Readiness complete (Referral Ecosystem live and approved). E4: Phase 2 Campaign object is marked Ready to Launch .
Week 9	PHASE 2 HARD LAUNCH & M5 START: Optimization	Agency: Launch Phase 2 Hard Launch (BSR Restoration, focusing on Emergency Conversion Model). Dev: Focus on Revenue by Persona/Partner reporting (E9).	Phase 2: Hard Launch live and driving conversion KPIs. E9: Revenue and Partner performance reports begin pulling live data.
Week 10	M5 BUILD: Financial Reporting / Non-Profit Content	Dev: Finalize Score Configuration admin panel (E7) and Agency Performance reports (E9). PM: Begin executing Act I & II Non-Profit Content creation.	E7/E9: All reporting and configuration tools delivered. Content: Act I (Need & Promise) and Act II (Process) non-profit content released.
Week 11	M5 COMPLETE: Revenue Scaling Framework	PM: Final audit of all M0-M5 checklist items. Owner: Review initial Revenue by Persona reports to confirm budget allocation strategy for Q4.	M5: Optimization complete (Full Revenue Attribution Framework live). Final Check: All 12 Nurture Sequences (Section 25) are active.
Week 12	CAMPAIGN WRAP: Full Non-Profit	Agency: Execute Act III (The Reveal) content push. PM: Collect final KPIs for Q3 review,	Project Exodus: Act III (Reveal) successfully published. Q3 Campaign: Completed and all financial outcome data reported.

Week	Phase Focus	Key Conversation / Check-In Focus	Completion Checklist
	Content Execution	prepare Q4 plan based on Revenue by Partner data.	

Completion Checklist (Acceptance Criteria)

Milestone ID	Key Acceptance Criteria (Julia's Sign-Off)
M0	Final scope and Fundraising Target (\$) for Project Exodus established and communicated.
M1	Core CRM (E1) and Lead/Partner Scoring (E7) are functional and tagging contacts/companies.
M2	Human Approval Queue (E5) is mandatory for all outbound campaign assets and copy.
M3	Next Best Action Engine (E8) is live and recommending 90%+ of follow-up steps for BD team.
M4	Trade Partner Referral Intake Form (E3) is live, and all Phase 2 BSR launch assets are Owner-approved (E5).
M5	Revenue by Persona/Partner (E9) reports are pulling live data, and the Score Configuration (E7) tool is working.
